New Teletype Allows Greater Coverage

WNTC campus radio is now offering complete up to date news coverage to the students of Potsdam State and Clarkson. This service has been made available to the station through the College Radio Corporation of New York City and with the cooperation of the Liggett and Myers Tobacco Company.

With the installation of a teletype in the Snell Hall studio, complete United Press International wire service coverage is on hand for the information of the students of both schools. The teletype now enables WNTC to report current headlines, bulletins, sports, and weather on its hourly newscasts. Also, the college news will be reported every hour.

According to WNTC's Station Manager, Donald Gabin, the teletype will increase the campus station's capacity to serve the student body and the listening audience, in addition to giving the staff of the station an opportunity to gain a wider variety of experience in radio broadcasting operations. He also stated that the Collegiate Billboard announcement service offered by WNTC is available to all clubs and organizations on both campuses at no charge.

Installation of the teletype machine has made openings on the WNTC staff for news editors and reporters, salesmen, publicity men, announcers, and operating engineers. Those interested in serving on the news staff should contact John Dalphin at Co 7-9372 or Co 7-2849. Also, all students interested in the station are welcome to WNTC's next general staff meeting, March 14, in the Snell Hall Auditorium.
